

QNF Master Fabrication Services - DRAFT

QNF Master Fabrication Service provides fabrication of SU-8 masters on silicon wafers for microfluidic device prototyping and production. Our cleanroom facility and technical staff deliver masters that serve as molds for PDMS casting and soft lithography applications.

Master Fabrication Services

- Design assistance
- Single layer SU-8 photolithography on silicon substrates (multi-layer possible upon review)
- Feature sizes from 20 μm (smaller features possible upon review)
- Channel depths to 100 μm
- Standard 4-inch wafer processing
- Quality inspection and characterization

Pricing

Our fabrication service provides a flat fee for each master:

- Single layer: \$1060
- Double layer (upon review): \$2780

Getting Started

[Contact us](#) with your design files and specifications for a detailed quote. Our team will review your requirements, discuss any design considerations, and provide transparent pricing based on complexity, materials, and timeline.
